RE: CEDAR CITY VALLEY ADJUDICATION

In order to properly control and distribute the waters of this underground water basin it is necessary that every water user having a well in this area equip it with a continuous recording measuring device.

We realize that this will be an additional expense to the individual water users, therefore, we will allow a period up to and including May 1, 1962, for the installation of these devices. If the devices are not installed by that date the individual will be forbidden the use of water until this order is complied with.

The State Engineer's Area Office, located at Cedar City, will be glad to assist you in determining what is needed on your individual well. If you need help you should contact that office for assistance in this matter.

Yours very truly,

Wayne D. Criddle
